

AgroConnect

SEED ROUND — 2026

Ghana's Agricultural Operating System.

Connecting verified Ghanaian farmers to local and international buyers through a trusted, escrow-powered marketplace — from seed to sale, every farm, every market.

SMALLHOLDER FARMERS

3%

DIGITIZED TODAY

A broken chain — at every link.

Ghana's agriculture feeds 33 million people and earns billions in exports. Yet the system that supports it is fragmented, analogue, and deeply inefficient.

- Farmers sell at farm-gate prices **60–80% below market** — middlemen capture the margin
- **40% of harvests rot** before reaching consumers or export markets
- Farmers have **zero access to formal credit** — no collateral, no credit history, no path to growth
- International buyers wanting verified Ghanaian supply have **no trusted platform** to source from
- Cross-border payments are slow, risky, and captured by brokers — **no escrow, no protection**

The opportunity is enormous.

Infrastructure, policy, and global demand have aligned. The window is open.

AFCFTA CONTINENTAL
MARKET

Only **3% of agricultural trade** in Ghana happens through digital platforms. Ghana is one of the world's top producers of cocoa, shea, cashew, pineapple, and fresh fish — yet most of it is sold untraced, through middlemen, at a fraction of its international value. **AgroConnect is the platform that changes this.**

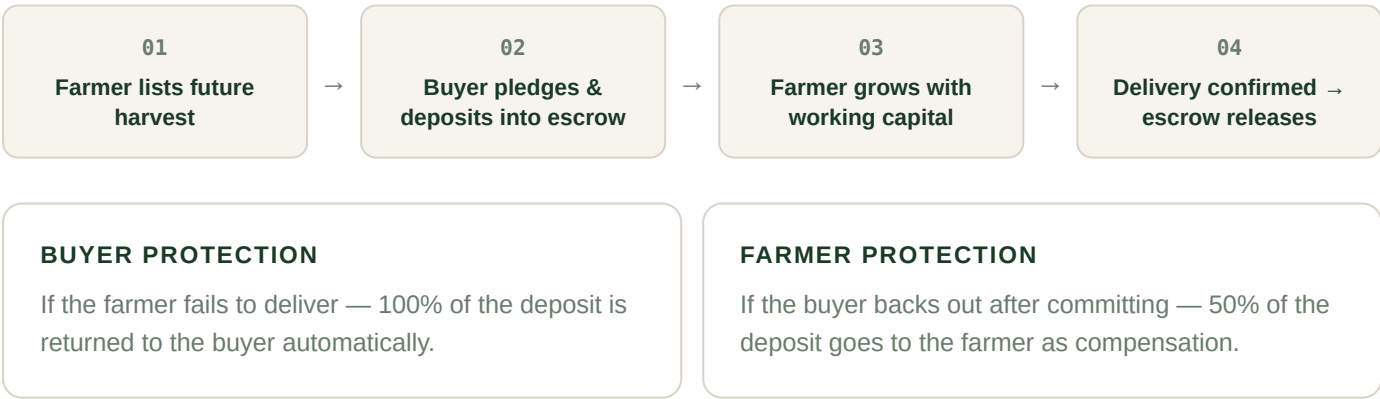

One platform. Three sides. Global reach.

AgroConnect is not a simple marketplace. It is the financial and logistical infrastructure of Ghanaian agriculture — built for local trade and international export simultaneously.

Actor	What they get on AgroConnect
Farmer	Direct access to local and international buyers, BNPL credit, weather alerts, digital wallet, AgroScore credit profile
Agro-Input Dealer	Digital storefront, order management, demand forecasting by region and season
Buyer — Local or International	Verified farm supply, harvest pre-booking, escrow-protected payments in USD / EUR / GBP / GHS

The Harvest Pledge — our core differentiator.

No competitor in Ghana or West Africa offers this at scale.

Bringing global buyers to Ghanaian farms.

Foreign buyers — supermarket chains, food processors, exporters, and restaurants in Europe, the Middle East, and North America — can now source directly from verified Ghanaian farms with full protection.

- Browse **GPS-tagged, field-verified farms** with full traceability and production history
- Reserve future harvests via Harvest Pledge — **months before the crop is ready**
- Pay securely in **USD, EUR, GBP, or GHS** through AgroConnect's built-in escrow
- Funds held in escrow — **released only on confirmed delivery**
- Full dispute resolution managed by AgroConnect — no brokers, no risk of fraud

Escrow — the trust infrastructure.

This is what makes international trade on AgroConnect possible.

Escrow Feature	Detail
Multi-currency	USD, EUR, GBP, GHS — international buyers pay in their own currency
Milestone releases	Large contracts can release in stages — on dispatch, on arrival, on quality sign-off
Full audit trail	Every transaction logged — exporters get documentation for customs and compliance
Dispute resolution	Managed by AgroConnect admin team with defined escalation paths
Escrow fee	1–2% of transaction value

The result: A buyer in Amsterdam or Dubai can open AgroConnect, find a verified cocoa farm in Ashanti, lock in a harvest pledge for 10 tonnes, pay into escrow — and track every step to delivery. No brokers. No wire transfers to strangers. No risk.

Multiple revenue streams. Built-in defensibility.

We earn on every transaction — and international escrow trades carry higher value and higher margins than local micro-transactions.

Revenue Stream	Rate	Notes
Direct produce sale commission	3.0%	On every confirmed local sale
Harvest pledge commission	2.5%	On total pledged value at booking
Agro-input sale commission	1.5%	On dealer transactions
BNPL interest spread	4–8% flat	On credit disbursed to farmers
International escrow fee	1–2%	Per cross-border transaction
Premium buyer subscriptions	SaaS	Enterprise accounts for large importers

Why we win — the moat.

AGROSCORE — CREDIT LOCK-IN

Every farmer builds a proprietary credit score (0–110) that unlocks credit, visibility to buyers, and better terms. Farmers cannot take this history elsewhere. It is ours.

ESCROW INFRASTRUCTURE

First platform to offer built-in escrow for Ghanaian agricultural exports. This is the trust layer international trade requires — and it takes years to build.

VERIFIED FARM NETWORK

GPS-tagged, field-agent verified farms. Not self-declared listings — actual physical verification. International buyers pay a premium for this assurance.

HARVEST PLEDGE

No competitor in Ghana or West Africa offers forward contracting for smallholder farm produce at scale. First-mover advantage in a market desperate for supply certainty.

The rails are being built.

We are raising a seed round to deploy across three pilot regions, onboard international buyers, and launch our escrow infrastructure.
